

Every Drop Matters:

Protect Yourself with Universal Precautions

Treat Every Patient As Infectious

Bloodborne pathogens like HIV, HBV, and HCV can be present in any patient. *Always* use universal precautions to minimize risk.

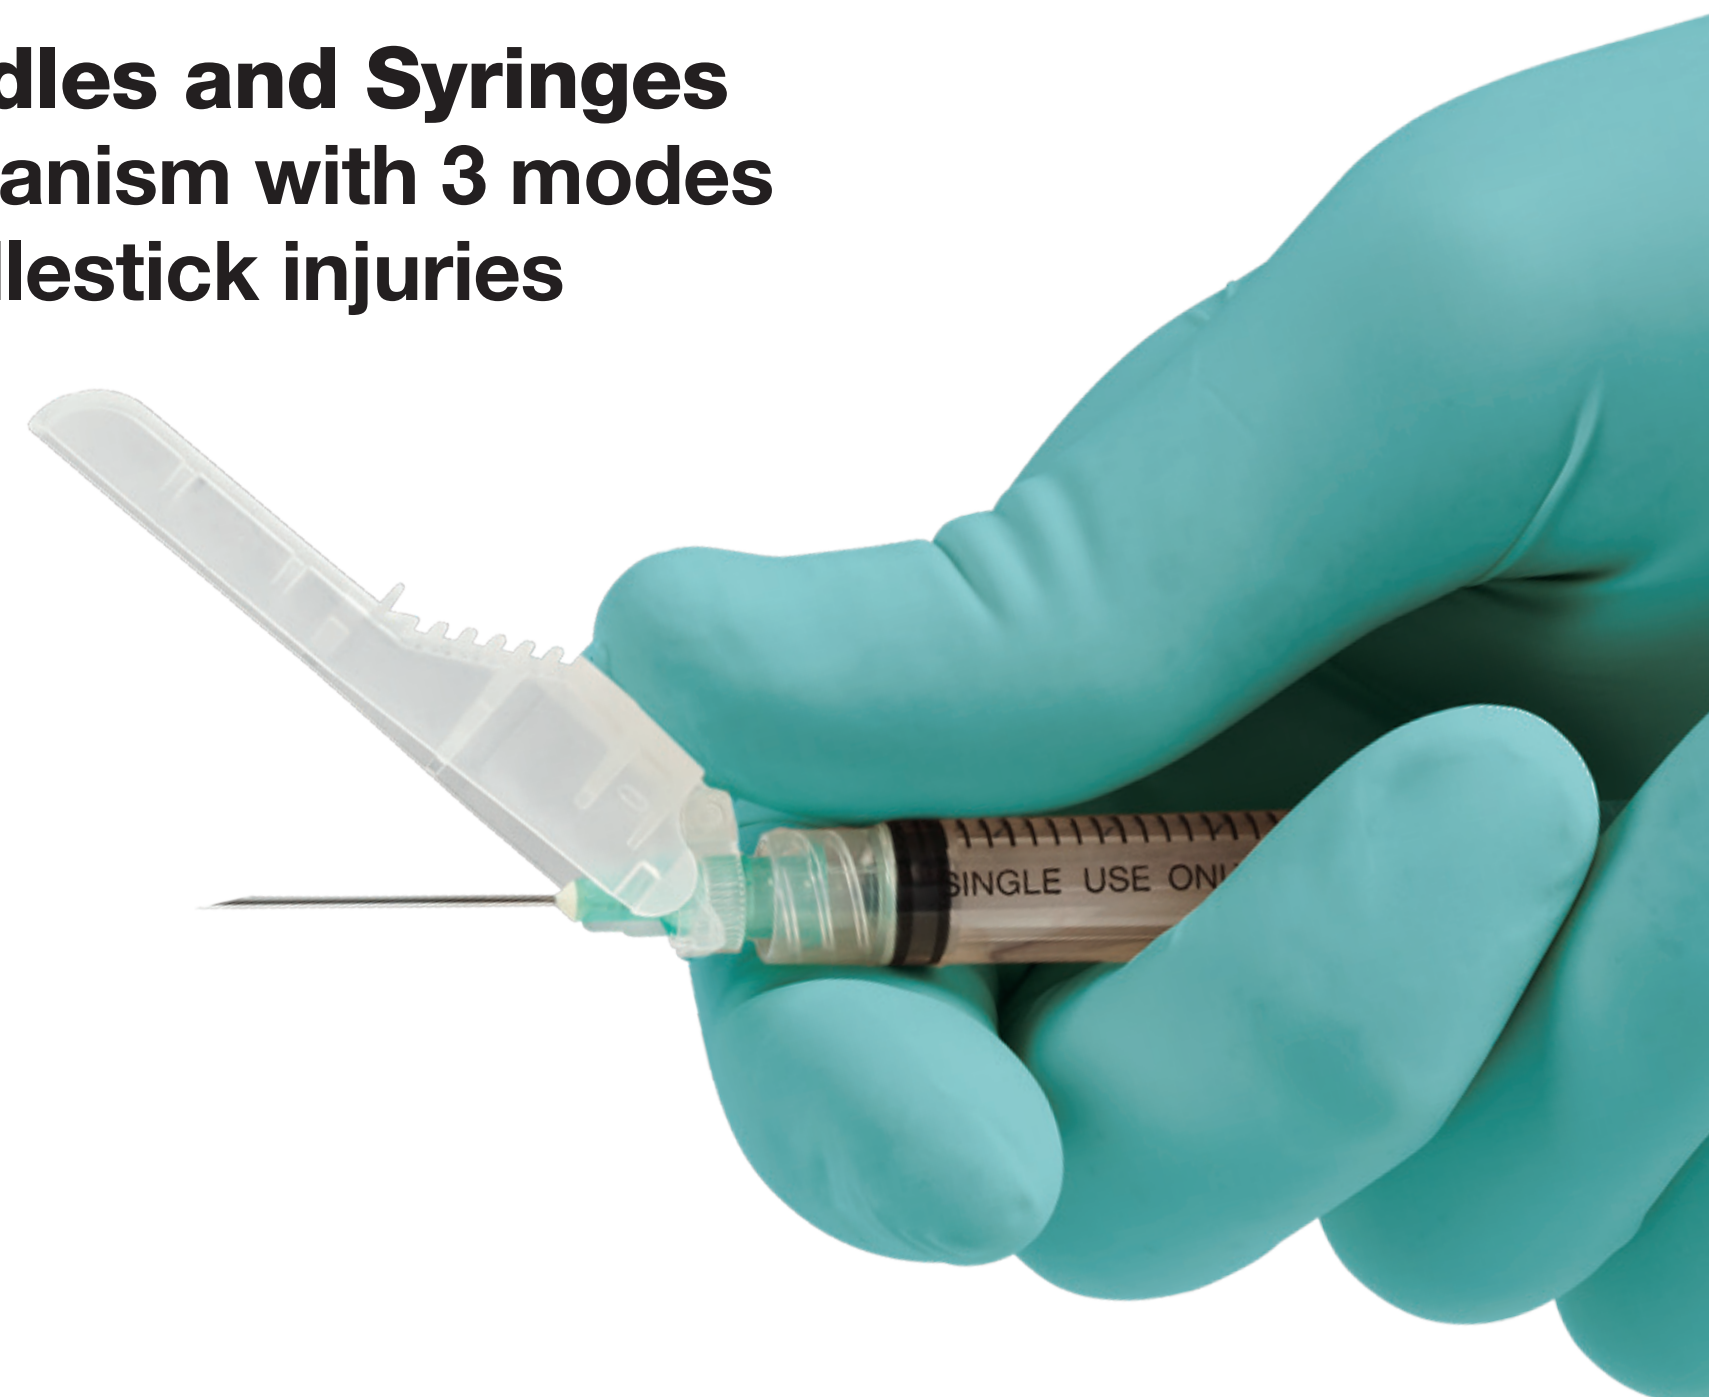

Key Actions:

- Wear appropriate PPE (gloves, masks, eye protection)
- Practice proper hand hygiene before and after patient contact
- Use safety-engineered devices to prevent needlestick injuries

Featured Product:

SurGuard™3 Safety Hypodermic Needles and Syringes are designed with a robust safety mechanism with 3 modes of activation to prevent accidental needlestick injuries

SurGuard™3
SAFETY HYPODERMIC NEEDLE

Quality time for better care
